-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 January 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-9, 11, 12, 14,15, and 17-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Sann (5,968,574), which shows all of the claimed limitations. Sann shows, among other things, a steam oven including a cooking cavity 12, steam generator 78,80,82, steam pipes 50,52, a plurality of irregularly shaped and bent steam distributing pipes 52b directed at different areas of the cavity, flow control adjustable by a user in the form of control circuit 60, button 62, switch box 58, timer 64, solenoid valve 56 positioned in the pipe 50, and an end wall 16,20 adjacent the steam pipe.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sann (5,968,574), which discloses substantially all of the claimed limitations. Sann does not specifically recite that the distributing pipe is produced by pressing stainless steel.

While the reference may be silent as to how the apparatus is manufactured, the prior art apparatus appears to be the same as claimed. This product-by-process limitation would not be expected to impart distinctive structural characteristics to the apparatus.

Accordingly, it would have been obvious to one of ordinary skill in the art at the time of the invention to have utilized any process including that which is recited in the claims to have produced the distributing pipe by pressing stainless steel. *Note: Applicant may overcome this rejection by providing evidence that the claimed product-by-process limitation imparts a distinctive structural characteristic to the claimed invention, but a statement or argument by Applicant will not be deemed factual evidence. **Of course, even if evidence were provided to overcome anticipation, one would still need to assess whether it would have been a prima facie obvious method.***

Allowable Subject Matter

6. Claims 4, 10, and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kirchhoff, Bullard, and Cappello disclose steam ovens with many, if not all, of the claimed components. Nevertheless, in order to avoid overburdening the applicant with redundant rejections, these references were not applied.
